High-brightness Open-frame Display 75XF3P

Customizable Open-frame Display for Smart Efficiency

Anti-Discoloration

3,000 nits
High Brightness

Space Efficiency

Energy Efficiency

High Reliability

Smart Monitoring
& Control

75XF3P

Screen Size / Panel	75" / IPS, M+
Native Resolution	3,840 × 2,160 (UHD)
Brightness	3,000 cd/m ² (Typ.), 2,800 cd/m ² (Min.)
Portrait / Landscape	Yes / Yes
Dimension / Weight	1,675.2 × 953.6 × 114.6 mm (W × H × D) / 32.7 kg
Key Features	Slim Design, Conformal Coating, Auto Brightness Control

Light on Every Frame, Every Business

Open-Frame Type

Open-frame Outdoor Display

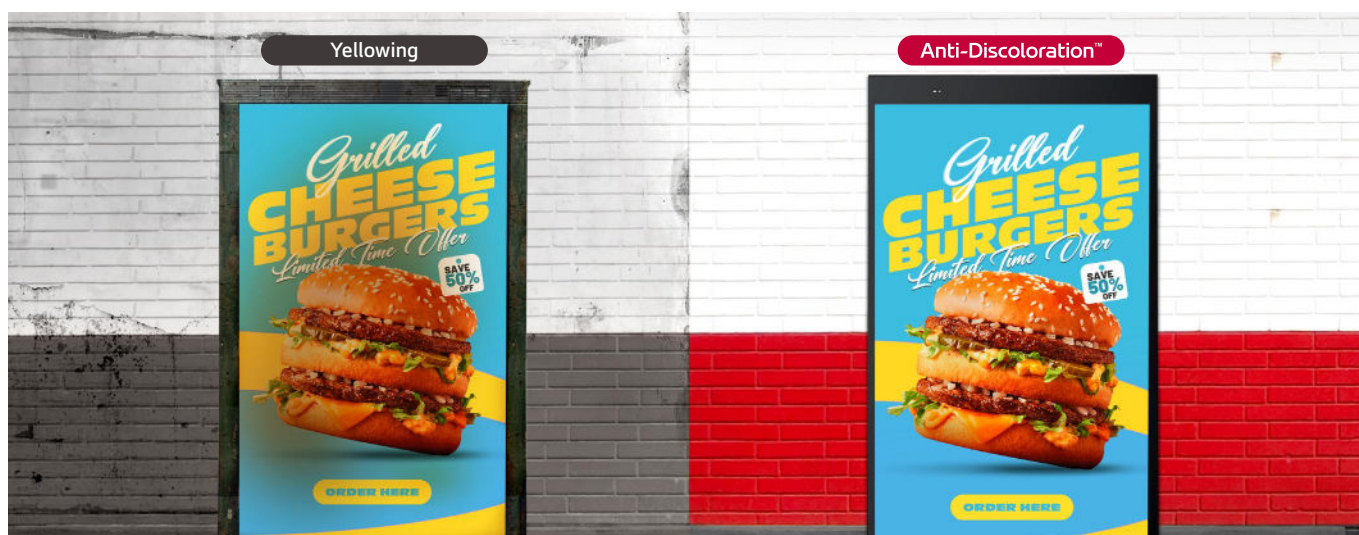

LG Open Frame display empowers you to personalize not only the casing design but also the function, granting you the freedom to tailor the display to your exact preferences.

* Please reach out to your local sales representatives for detailed casing guide

Stay Bright, Stay Ahead

Anti-Discoloration

World's First UL Verification for Display Anti-Discoloration Characteristics

By focusing on the pain points of our customers, we obtained the world's first UL Verification for Display Anti-Discoloration Characteristics. Our new technology helps prevent 'screen-yellowing', while safeguarding display quality and performance stability.

* World's first UL Verification in the manufacturing industry

* For more details about UL Verification, please visit <https://verify.ul.com/verifications/1382>.

Always Bright, Always in Sight

 3,000 nits High Brightness

 Polarized Sunglasses

High Visibility Under Strong Sunlight

With outstanding high brightness of 3,000 nits (Typ.), the XF3P outdoor display delivers content clearly while captivating passerby. In addition, its outdoor visibility can deliver a variety of information even to those wearing polarized sunglasses.

Optimal Performance, Minimal Cost

 Space Efficiency

 Energy Efficiency

Optimized Design for Double-sided Display

The XF3P, featuring a sleeker design than the conventional model, excels in maximizing space efficiency with its convenient double-sided display.

* The conventional model refers to the XF3C.

Efficient Energy Management

The screen brightness is automatically adjusted depending on the ambient light. The brightness is increased in light for better visibility, while it is decreased in darkness for efficient power management. Also, XF3P uses M+ panel that can offer high energy efficiency and cost savings by decreasing power consumption.

* M+ IPS reduced approximately 35% BLU Power consumption (IEC62087, 10 min) compared to RGB IPS, tested under same brightness (@fullwhite, 400 nits).
* Specific features can differ from circumstances.

High-performance with webOS 6.0

Quad Core SoC (System-on-Chip) can execute several tasks at the same time without a separate media player. In addition, webOS 6.0 platform enhances not only user convenience with intuitive UI but also web-app integration with updated Node JS / Chromium version.

More Enduring, More Reliable

-  Wide Operating Temperature
-  Conformal Coating
-  Solar-loading Tested

Wide Range of Operating Temperature

The XF3P can be used under a wide range of operating temperature from 0°C to 50°C.

* Conducted by LG internal test, Operating temperature: 0°C-50°C (without direct sunlight; with direct sunlight in cooling system), 0°C-40°C (with direct sunlight)

Conformal Coating

Conformal Coating* protects the circuit board and power board against dust, iron powder, humidity, etc.

* Thin protective films/breathing membranes that filter water vapor and solid debris

* All images in this datasheet are for illustrative purposes only.

Installation Guide for a Customized Casing

LG offers an installation guide for designing a customized casing to ensure stable performance for outdoor displays. It includes information about the size of ventilation and the location of partitions within the casing.

Control with Ease, Even from Afar

Smart Monitoring & Control

LG ConnectedCare

LG SuperSign Cloud

Web Monitoring

The LG Control Manager, the embedded web monitoring program, is user-friendly and enables the user to have full access anywhere at anytime from their mobile phone or PC while having access to both current and past data. It allows the user to monitor the unit, make adjustments, and control the unit remotely in real time.

* Enabled by wired LAN connection

Professional Content Partners

Pairing the XF3P with LG SW solutions would enhance its utilization.

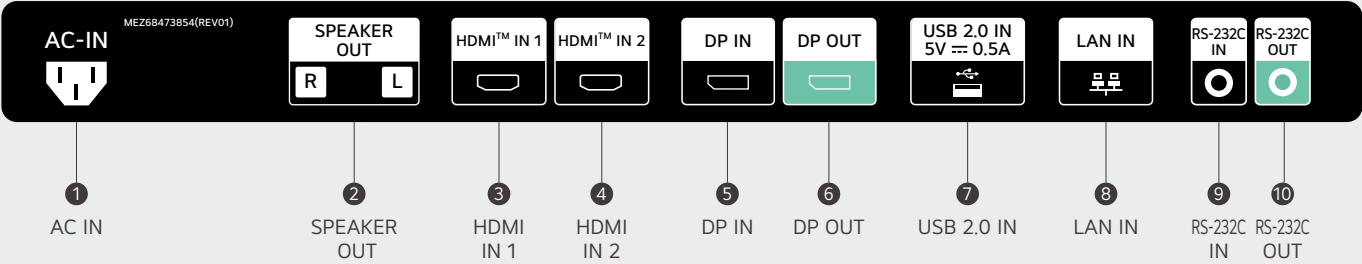

* Sold separately
