Mimo FlashCast for Education

Your notifications aren't reaching every screen on campus. Now they can.

Schools already have screens in classrooms, hallways, cafeterias, and offices, but are they optimized for communication? Mimo FlashCast transforms existing displays into a real-time visual alert network helping schools deliver clear safety instructions when seconds matter.

FlashCast overlays emergency or informational alerts onto ANY HDMI-enabled device without interrupting normal use unless an alert is active.

Schools can display messages such as:

- Lockdown
- Shelter in Place
- Evacuate
- Severe Weather Warning
- Area or Entrance Closed

FlashCast allows facilities to communicate clear, specific instructions like "West Entrance Closed" to any HDMI-enabled screen in real time.

Why Visual Alerts Matter in Schools

Alarms and PA announcements signal that something is wrong. **Visual alerts communicate what to do next.**

FlashCast enables administrators to instantly deliver clear instructions across classrooms, hallways, and common areas—helping students, staff, and visitors respond quickly. Visual alerts also improve accessibility for individuals who may not hear audio announcements.

Use the Screens Schools Already Have

Mimo FlashCast is an **affordable way to extend alerts to displays already deployed in schools and campuses.**

- Smartboards and interactive displays
- Hallway and common-area TVs
- Digital signage systems
- Projectors in lecture halls or auditoriums.

Built for K-12 and Higher Education

- **K–12 Schools** - District-wide deployments, Accessibility compliance, Campus safety initiatives
- **Higher Education** - Campus-wide emergency notifications; Building or zone-based alerts; Severe weather messaging; Large campus communications

Key Features

- Plug-and-play with any HDMI-enabled device
- Hardware/software solution built for reliability
- Cloud-managed and scalable; no CMS required
- Minimal training required for end users
- Purpose-built for safety environments
- Wired or WiFi connectivity

Current Integrations: singlewire InformaCast, everbridge, WSPER, RAPTOR TECHNOLOGIES, ALERTUS
